

LazyOS PDF Viewer

A sample document

LazyOS reads PDF documents with hayro, a PDF rasterizer written in pure Rust. This sample exercises the parts of a renderer that are easy to get wrong, one page at a time, and doubles as the document the viewer's screenshot session opens.

Standard 14 fonts, not embedded:

Helvetica: The quick brown fox jumps over the lazy dog.

Times-Roman: The quick brown fox jumps over the lazy dog.

Courier: The quick brown fox jumps over the lazy dog.

Times-Italic: The quick brown fox jumps over the lazy dog.

Courier-Bold: The quick brown fox jumps over the lazy dog.

An embedded TrueType font

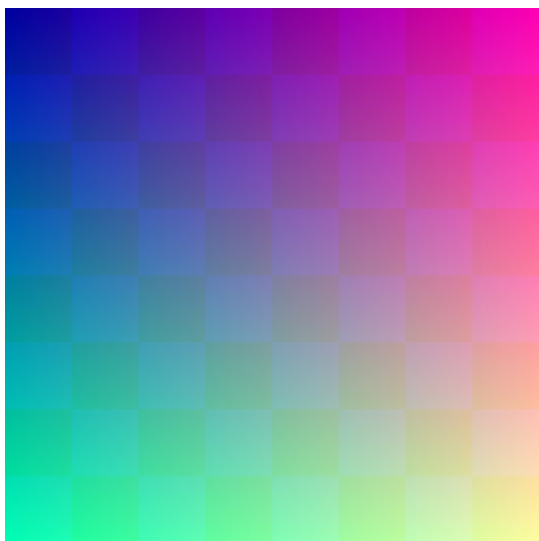

This page is set in Droid Serif, embedded (subset) in the file, so no substitute is needed. Accents and symbols: café, naïve, Ærøskøbing, Ångström, déjà vu, € 42, ±1 °C, “quotes” and ‘single’.

A keeper climbed the lighthouse every evening to light the lamp. The word lighthouse appears three times on this page, which the find bar counts: lighthouse.

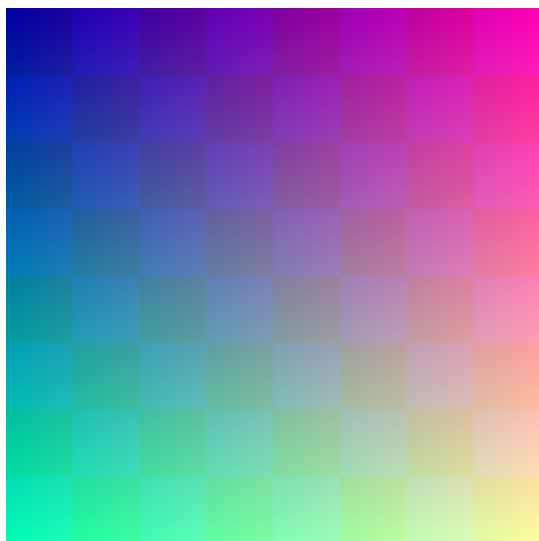

Pictures and transparency

JPEG (DCTDecode):

JPEG 2000 (JPXDecode):

This page has /Rotate 90

Viewers show it in landscape, turned clockwise.

A landscape page (MediaBox wider than tall)
